

How secure is my information through Health365?

Your security is our highest priority. You and your healthcare provider have absolute control over who can access your data.

None of your health information is stored by us. We simply provide a channel, guarded by multiple layers of encryption, which connects you with the data stored by your general practice.

Your information is protected by a user name and password. You will be asked to change the initial password with your own password when you sign up.

To get started, just ask your practice receptionist.

health365.co.nz

It's your health.

Manage it online 24/7.

Health
365

This new online service lets you:

- **Make appointments with a GP or nurse**
- **Order repeat prescriptions**
- **View and track your tasks and measurements**

What is Health365?

Health365 is an online service provided in partnership with your general practice. It gives you secure access to some of your own health information and a wide range of other services that make it easy to manage your own healthcare.

What can I do with Health365?

Access all these services anytime, anywhere online from your PC, tablet, or smartphone:

- > Make appointments with your GP or nurse any time of the day or night.
- > Order repeat prescriptions for your regular medications.
- > Access your medical history summary, regular medications and immunisations.
- > View and track your:
 - Allergies
 - Measurements
- > Get a list of scheduled events (e.g. due dates for mammography, immunisations and health screens).

What does it cost?

This service is FREE.

How do I get access to Health365?

It's easy. Just ask your GP at your next visit.

Your practice administration team will sign you up and send you a confirmation email. Once you receive the email, just follow the link to the website and enter the user name and password provided.
